## **Interstate Transport Garners *Food Logistics* Magazine's FL100 Award**

### **Interstate again acknowledged by industry as Logistics Technology Leader**

**Saint Petersburg, Florida – January 13, 2010** – Interstate Transport has received *Food Logistics* Magazine's FL100 Award. This recognition is a result of Interstate's continued innovation in the Logistics Technology market. Interstate Transport joins other industry leaders such as Qualcomm, Motorola and UPS on this year's prestigious list.

Interstate Transport, the industry-leading third-party logistics and transportation company, has received many accolades and is proud to add the *Food Logistics* honor to its growing list of awards. Earlier this year, *Inc.* Magazine named Interstate Transport the Fastest-Growing Logistics & Transportation Company in Florida. *Inbound Logistics* Magazine named Interstate Transport and its sister software company, InMotion Global, a Top 100 Logistics IT Provider. *Inbound Logistics'* editor, Felecia Stratton, had this to say about Interstate Transport's Transportation Management System, "...InMotion Global TMS™ consistently provides the kinds of technology solutions business logistics managers need to successfully manage their global enterprises."

Interstate's goal has always been to deliver innovative solutions and services to its clients that help lower their transportation costs and improve their customer service performance. Add to that Interstate's unparalleled truck and freight movement capacity and you see why this company is continuously singled out for industry praise. *Food Logistics* Magazine recognized Interstate Transport success in enabling grocery and foodservice distributors to reach their business goals. This year's list focused on technology providers who offer customers help in managing change through hard economic times with technology.

Tim Higham, CEO of Interstate Transport, said, "We are honored to be recognized by *Food Logistics* Magazine as an industry leader in transportation services, technical solutions, and best practices. Our customers have found that our systems provide the agility and efficient implementation that their complex shipping operations demand." Interstate's Transportation Management System, InMotion Global TMS™, is intuitive and customizable which means that users save time and improve accuracy, which in turn directly affects the business' bottom line. Interstate has built its three-pronged service model around providing the capacity its customers need, offering the most competitive prices in the market and taking full advantage of the latest trends in transportation and logistical technology.

**About Interstate Transport:**

Interstate Transport, Inc. is one of the fastest growing logistics providers in the United States. Headquartered in St. Petersburg, Florida, Interstate provides logistics, and distribution services and complete logistics outsourcing solutions including transportation management software (InMotion Global TMS™) to customers across the United States. Interstate's Freight Management Center and Disaster Freight Management Center provide: trucking capacity and Internet load tracking for every shipment, routing and load optimization, Internet load tendering, guaranteed appointment setting, and complete efficiency reporting.
