Interstate Announces Free Transport Management System

InMotion Global[®] provides load optimization, routing, load management, Internet load tracking, load posting, reporting and hundreds of other features.

Monday, June 05, 2006

Saint Petersburg, FL: Interstate Transport, Inc., the leading freight management and logistics company, today announced it would provide its industry leading transportation management system (TMS) for free to its customers. The InMotion Global[®] software platform is a full-service TMS system, including complete Internet load tracking of loads. The software allows users to completely manage freight and logistics as well as all associated paperwork. Moreover, the system supports unlimited locations and allows tendering to drivers and carriers over the Internet.

InMotion Global[®] is connected electronically to Interstate's Freight Management Center (FMC). If a user needs to access capacity, or needs help with a load, they can access the capacity network built into the system. This allows users to gain access to tens of thousands of drivers that are pre-qualified (with the appropriate insurance and authority) and are ready to provide first class service for a user's loads. Further, InMotion Global[®] users obtain complete control over every aspect of the load.

Tim Higham, president and CEO of Interstate said, "InMotion Global[®] is truly an industry and world first. It provides complete logistics management and is supported by our 24 hour Freight Management Center in Florida. Users gain complete control over every aspect of their freight management, including routing and optimization, load tendering, load tracking, and every other aspect of assuring successful logistics control. Best of all – the system is 100% free of charge to all users."

InMotion Global[®] is designed to perfectly support a wide variety of commodities and is perfect for collect freight, pre-paid freight and the VMI (vendor managed inventory) freight model. Initial installations are in the challenging live goods and nursery markets, where the perishable nature of the product means any logistics platform must be highly efficient and adaptive. To learn more about InMotion Global[®] call, Sean Storr on 800-966-6183 ext. 1317.
